“Since 1992, the same fundamental values that we started with are still a part of our company culture, and we believe you’ll notice this whenever you deal with anyone from TR Group.”

Our Values

Ownership

“TR is its people of which I am one”

We take personal responsibility and understand our contribution makes a difference to what TR stands for and does. We understand how value is created and how we contribute.

Teamwork

“Together we are better”

We support, encourage, celebrate and respectfully challenge each other, to achieve something extraordinary.

Leadership

“Being aware of and deliberate with our influence”

Knowing ourselves – we stay humble, continually learning and growing. Leading others - we find ways to support our team to be at their best. Leading the business - through our actions and understanding their impact.

Honesty

“With ourselves and others”

We choose the often harder yet ultimately healthier path of being true to ourselves and constructively honest in our communication and relationships. Honesty is a cornerstone of TR.

Continuous Improvement

“Consciously challenging ourselves to be better”

Learning and having the courage to act creates success for:

- Ourselves
- Our families
- The TR team

Care

“About what we do and what it results in”

Doing what’s right, for each other, in our work, our community and the environment. Leaving a lasting imprint.

Customers

“The very reason for our work”

We work hard to understand and provide what our customers really value. Every customer of TR is ‘our’ customer.

Work ethic

“Do an honest day’s work and you will be fine”

Everyday we do the best we can. The judge of that is ourselves.
